PRESENTACION

Esta publicación da a conocer los principales resultados del III Censo Industrial de Colombia de 1970 y forma parte, conjuntamente con la Muestra Mensual Manufacturera y las Encuestas Anuales, de un sistema estadístico integrado que permite estudiar la estructura económica del sector.

El III Censo Industrial captó información referente a las características y operaciones desarrolladas durante 1970 por los establecimientos manufactureros existentes en el país y que ocupaban cinco (5) y más personas, según los diferentes sub-sectores de la manufactura, la localización tamaño y forma jurídica de las firmas.

El texto incluye cuadros que presentan la información del sector manufacturero en dos niveles: el primero muestra la información nacional de la totalidad de las variables investigadas, desglosada por agrupaciones y grupos industriales. En segundo término se incluye la información de las secciones del país y de los principales conjuntos urbanos que internamente se han adoptado como áreas metropolitanas. Este tipo de información permite observar las características y las actividades que se desarrollan a nivel geográfico, así como el peso que tienen las distintas secciones del país dentro de los agregados nacionales. Los cuadros incluidos en la publicación constituyen una parte de los procesados para el censo. El total de los tabulados se encuentra disponible en el Banco de Datos del DANE.

1. Reseña histórica de los Censos Industriales

El Primer Censo Industrial del país se realizó en 1945, con referencia al período comprendido entre el 1o. de junio de 1944 y el 30 de junio de 1945. Por recomendaciones internacionales y por la experiencia obtenida en otros países que ya habían efectuado su censo industrial, se optó por la conformación de un marco censal compuesto por los establecimientos que tuvieran cinco (5) o más personas ocupadas o un valor de producción anual no inferior a \$6.000. Los resultados de este censo arrojaron 7.853 establecimientos que ocupaban 135.400 personas y registraron una producción de \$641.1 millones.

El Segundo Censo se realizó en 1954 y cubrió del 1o. de enero al 31 de diciembre de 1953. Inicialmente se impuso la recolección de la información a todos los establecimientos, sin límites de personal ocupado, lo que dió como resultado 47.112 establecimientos y una producción de \$3.950 millones. Sin embargo, se pudo precisar que los establecimientos pequeños tenían un valor de producción poco importante y, en cambio, el procesamiento de más de 47.000 establecimientos, en su mayoría pequeños (menos

de cinco personas ocupadas) y con mínima producción, elevaría los costos y además los resultados tardarían mucho más. De acuerdo con estas consideraciones, se recurrió a la eliminación de los establecimientos con menor importancia económica, integrando un marco censal con establecimientos que tuvieran 5 o más personas o una producción no inferior a \$24.000. En tales condiciones, se procesaron 11.243 establecimientos con un empleo de 199.116 personas, una remuneración de \$430.5 millones (salarios más prestaciones sociales) y una producción de \$3.840.2 millones.

Para 1970 se realizó el Tercer Censo Industrial conjuntamente con los Censos de Comercio y Servicios. Para la investigación se dividieron los establecimientos en dos clases: la primera consideraba los establecimientos con 5 o más personas ocupadas, en tanto que el segundo grupo comprendía los establecimientos con menos de 5 personas empleadas, los cuales fueron investigados mediante técnicas de muestreo. Los resultados contenidos en esta publicación se refieren a los generados por las firmas que registraban 5 y más personas ocupadas. En la actualidad se encuentran en revisión las cifras correspondientes a los pequeños establecimientos (menos de cinco personas ocupadas).

En el intervalo de los tres censos descritos, el DANE ha venido realizando las Encuestas Anuales de la Industria Manufacturera en forma ininterrumpida desde 1955 y como período económico ha tomado el correspondiente al año calendario.

2. Bases legales

Las bases legales para la realización de los Censos Económicos, de los cuales forma parte el Censo Industrial, se encuentran contenidas en la Ley 2a. de 1962, la cual dispuso el levantamiento de los Censos Nacionales y en especial el de Industria, Comercio y Servicios. Igualmente, el Plan Trienal de Desarrollo traía como parte integrante de su implementación el levantamiento durante 1971 de los Censos Económicos mencionados.

Por otra parte, el Decreto No. 1633 en su Artículo 74 establece que: "Todas las personas naturales o jurídicas, domiciliados en el Territorio Nacional y los empleados públicos, en todos sus niveles, están obligados a suministrar al Departamento Administrativo Nacional de Estadística dentro de los plazos que al efecto se señalen, los datos que este requiera para el cumplimiento de sus finalidades, y a cumplir las normas que se dicten sobre la materia".

3. Confidencialidad de los datos

El Artículo 75 del Decreto No. 1633 de 1960 establece: "Los datos que están obligados a suministrar las personas naturales o jurídicas domiciliadas o residentes en el Territorio Nacional, tendrán un carácter estrictamente reservado, y por tanto no podrán darse a conocer al público ni a las entidades oficiales, sino únicamente en resúmenes numéricos, que no hagan posible deducir de ellos información alguna de carácter individual que pudiera utilizarse para fines de tributación fiscal, investigación judicial o cualquier otro objetivo diferente del propiamente estadístico".

Como en los cuadros a nivel de secciones del país y los resúmenes por Áreas Metropolitanas se encontraron datos que correspondían a menos de dos establecimientos, el DANE, con el fin de cumplir con lo dispuesto por la Reserva Estadística, se vió en la necesidad de eliminar en estos cuadros la columna del número de establecimientos.

4. Clasificación de actividades

La información correspondiente al III Censo Industrial se agrupó de acuerdo con el "Manual de Clasificación para Colombia de los Establecimientos Manufactureros" que es una adaptación de la Clasificación Industrial Internacional Uniforme de todas las Actividades Económicas (CIIU revisión 2a.) de la Organización de las Naciones Unidas. En la nomenclatura de actividades se distinguen cinco niveles: Gran División, representada por un (1) dígito, se refiere a los grandes sectores de la economía (en el caso de este censo, la Gran División 3 corresponde a las industrias manufactureras). El siguiente nivel es la División representada por dos (2) dígitos, que agrupa actividades manufactureras similares en cuanto al tipo de bienes producidos. Por ejemplo, la División 31 comprende las ramas productoras de alimentos, bebidas y tabaco. A continuación se establece la Agrupación (3 dígitos), la cual identifica la actividad específica de las firmas. Por ejemplo, la agrupación 311-312 ubica los establecimientos productores de alimentos. El Grupo codificado por cuatro (4) dígitos incluye las familias de actividades comprendidas en la agrupación. Por ejemplo, al Grupo 3111 corresponde, dentro de la agrupación de alimentos, la matanza de ganado, preparación y conservación de carnes. Finalmente, el nivel más detallado identifica la clase (5 dígitos) o la Industria propiamente; ejemplo: la clase 3111-1 corresponde a la actividad de matanza de ganado mayor con o sin frigoríficos.

La parte correspondiente al sector industrial del Manual de Clasificación para Colombia de los Establecimientos Manufactureros, a nivel de agrupaciones y grupos industriales, se presenta como anexo (1) en la parte posterior de esta descripción. Se inserta, igualmente, la equivalencia a nivel de tres dígitos (agrupaciones industriales) entre la Antigua Clasificación (Revisión 1) y la Nueva Clasificación Industrial Internacional Uniforme (Revisión 2), con el objeto de permitir al usuario la comparabilidad de las cifras resultantes del III Censo Industrial con los resultados de las Encuestas y Censos precedentes.

5. Boleta censal

Con el propósito de lograr un máximo de comparabilidad con las Encuestas implementadas a partir de 1955, el formulario censal empleado fue muy semejante al de los años anteriores, tanto en lo que respecta a su formato como a la selección y definición de las variables investigadas. No obstante, pareció conveniente adicionar algunas variables importantes, tales como el tipo de organización económica de las firmas, el crédito otorgado a la industria en 1970, la composición del capital pagado y el valor de los activos fijos al 31 de diciembre de 1970. La indiscutible importancia de estos conceptos para estudios de diversa índole, así como la carencia de información al respecto, motivaron la inclusión de tales variables. Sin embargo, en la presente publicación solamente se registra la información referente al valor de activos fijos al 31 de diciembre de 1970, en virtud de la falta de consistencia advertida, en algunos casos, por estas variables.

En el anexo 2 de esta presentación se incluye el cuestionario utilizado para la recolección de los datos de los establecimientos de 5 y más personas ocupadas.

6. Unidad estadística

Para los fines de los Censos y de las Encuestas Industriales se ha tomado como Unidad Estadística el Establecimiento Industrial, el cual se define como la combinación de recursos físicos, humanos y financieros, dirigida por una sola entidad propietaria o administradora, hacia la producción del grupo más homogéneo posible de bienes, generalmente en un solo lugar, pero a veces en una zona más extensa, para la cual se llevan registros independientes, que pueden proporcionar datos sobre la producción de estos bienes y los materiales, mano de obra y recursos físicos usados directa o indirectamente en el proceso de producción.

7. Recomendaciones internacionales

Se tomaron en cuenta las últimas recomendaciones internacionales, aun cuando adaptadas a las necesidades de información del país, tanto en lo que concierne a la clasificación de actividades como a las definiciones de unidad estadística y de la mayor parte de los conceptos incluidos en la investigación. Los organismos internacionales que actualmente trabajan en el campo de recomendaciones para la elaboración de estadísticas industriales son en su orden, la Oficina Estadística de la Organización de las Naciones Unidas y el Instituto Interamericano de Estadística (IASI) que forma parte de la Organización de los Estados Americanos (OEA).

8. Actividades preparatorias

Esta fase, en términos generales, comprendió el diseño del plan de actividades; el estudio de las recomendaciones internacionales, definiciones, clasificaciones; preparación de un Directorio preliminar; consulta a las fuentes y a los usuarios sobre la factibilidad en la inclusión de algunos conceptos, trabajos de cartografía; pruebas pilotos; preparación e impresión de formularios e instructivos; diseño de tabulaciones; labores de propaganda, elaboración de procedimientos de supervisión, de crítica, manual y electrónica; preparación del empadronamiento.

9. Cobertura geográfica

La cobertura geográfica para los establecimientos con cinco o más personas ocupadas, comprendió la totalidad del territorio nacional, en tanto que la de los establecimientos pequeños —con menos de cinco personas ocupadas— estuvo constituida por las doce (12) conjuntos urbanos más importantes según su número de habitantes (primera etapa) y los seleccionados para la muestra realizada en la segunda etapa.

En la primera etapa del proceso de enumeración fueron seleccionadas las siguientes ciudades: Bogotá D.E. y Soacha; Cali y Yumbo; Barranquilla y Soledad; Medellín, Barbosa, Copacabana, Bello, La Estrella, Sabaneta, Itagüí, Caldas, Girardota y Envigado; Cartagena; Manizales; Pereira; Ibagué; Palmira; Bucaramanga; Cúcuta y Armenia. En esta etapa se censaron todos los establecimientos de industria considerados como grandes; los establecimientos pequeños se investigaron por muestreo. (El tamaño de la muestra fue del 20o/o).

La segunda etapa censal comprendió la recolección de la información de los establecimientos con cinco o más personas del resto del país y, además, de los establecimientos pequeños de 179 municipios seleccionados, en donde se aplicó el sistema de muestreo denominado multietápico, estratificado con probabilidad controlada que asegura la representatividad, tanto del país como la de los departamentos.

10. Crítica y análisis de la información

Una vez recolectados los formularios se procedió a efectuar la revisión manual de la información por los conceptos de la corrección de respuestas no registradas, contradictorias o equivocadas, errónea interpretación de conceptos y definiciones, lo mismo que la transcripción de los códigos y la preparación de los formularios para la perforación y verificación.

Posteriormente, la información se sometió a un proceso de crítica más profundo, para lo cual fue utilizado un buen número de relaciones de consistencia, que garantizan un máximo de calidad de la información.

11. Definiciones básicas

Con el objeto de facilitar una mejor interpretación de los cuadros contenidos en el texto, se presentan las principales definiciones de los conceptos a que se refieren los resultados obtenidos.

Industria Manufacturera. Para efectos de las investigaciones estadísticas se define como la transformación mecánica o química de sustancias orgánicas e inorgánicas en productos nuevos, ya sea que el trabajo se efectúe con máquinas a mano, en fábrica o a domicilio, o que los productos se vendan al por mayor o al por menor. Incluye, el montaje de las partes que componen los productos manufacturados, excepto en los casos en que tal actividad sea propia del sector de construcción.

Personal ocupado. El número de personas ocupadas en el establecimiento se define como el total de las que trabajan

en él, incluidos los propietarios que trabajan, los socios activos y los trabajadores familiares no remunerados. Los datos sobre personal ocupado se solicitan por categorías ocupacionales, según conste en las nóminas de pago en la semana que incluye el 15 de noviembre de 1970, o la fecha más próxima a esta para la cual se dispone de datos.

La información para esta variable se presenta para cinco (5) categorías de personal, discriminadas de la siguiente forma:

- a) Propietarios, socios y familiares sin remuneración fija
- b) Personal directivo y técnico (diferenciado entre nacionales y extranjeros)
- c) Empleados
- d) Obreros y operarios
- e) Aprendices

Sueldos y salarios. Se define como la remuneración que recibe el trabajador en dinero o en especie en forma periódica o diferida por los servicios que prestan a los establecimientos, antes de deducir los descuentos por retención en la fuente, contribuciones al Seguro Social, al Sindicato, al Fondo de Empleados y similares. En este concepto se incluyen como tales, los pagos por vacaciones, los subsidios de transporte, pagos por horas extras y días feriados y otros contemplados en el Código Sustantivo del Trabajo.

Prestaciones sociales. Abarca los pagos obligatorios o voluntarios diferentes a los sueldos y salarios que el empleador efectúa a sus empleados. La suma de este concepto con el anterior representa la remuneración total de los trabajadores.

Producción bruta. El valor de la producción bruta es igual "al valor de todos los productos del establecimiento" más los "ingresos por trabajos industriales o servicios proporcionados a otros" más el "valor de los bienes expedidos en la misma condición en que se recibieron" más el "valor de la electricidad vendida" más el "valor del trabajo en curso al fin del año" menos el "valor del trabajo en curso al principio del año".

Consumo intermedio. Se define como "el valor de los insumos consumidos en el proceso productivo de los bienes y servicios". Incluye "el valor de las materias primas nacionales y extranjeras, materiales, combustibles, energía eléctrica comprada y servicios industriales suministrados por otros establecimientos".

Valor agregado bruto. Es el total de ingresos percibidos por los factores productivos (tierra, trabajo, capital, organización empresarial) participantes en el proceso de producción durante el período. El DANE obtiene el valor agregado de la industria manufacturera deduciendo del valor de la producción bruta el consumo intermedio.

Energía eléctrica consumida. Comprende el consumo en K.W.H. de la energía eléctrica, ya sea comprada o producida por el establecimiento.

Gastos industriales. Bajo este rubro se presentan los valores de ciertos gastos que siendo importantes para el mantenimiento y funcionamiento de las plantas industriales no son considerados en ningún otro ítem. El DANE señala seis (6) tipos de gastos industriales así:

- a) Accesorios y repuestos de duración menor de un año
- b) Combustibles y lubricantes consumidos
- c) Pagos por trabajos de carácter industrial realizados por otros establecimientos
- d) Pagos a trabajadores a domicilio
- e) Pagos por trabajos de reparación y mantenimiento efectuados por terceros
- f) Valor de compra de materias primas y otros productos vendidos sin transformación.

Gastos generales. Esta clase incluye el costo de todos los servicios no industriales prestados por otros establecimientos o particulares, pagados por el establecimiento informante y reflejados en el valor de su producción durante el año. Estos gastos se han discriminado en la siguiente forma: arrendamientos, servicios profesionales (honorarios), intereses sobre créditos, seguros

(excepto seguro social), agua, correo y teléfono, publicidad y propaganda, depreciación en 1970, impuestos indirectos (causados en 1970), pago de regalías y otros gastos.

Variaciones de las existencias. Su objetivo es el de detallar el valor de los elementos componentes de las variaciones globales de las existencias al principio y al final del año, bajo los siguientes conceptos:

- a) Materias primas, materiales, combustibles y lubricantes
- b) Productos en proceso de fabricación
- c) Productos acabados .

Inversión bruta. Comprende la suma de las inversiones en los activos fijos nuevos, los usados y los fabricados para su propio uso, menos las ventas de bienes similares. Los activos fijos se dividen en cinco clases: terrenos adquiridos para fines industriales, edificios y estructuras, maquinaria y equipo, equipo de transporte y equipo de oficina. La inversión neta es el resultado de sustraer de la inversión bruta la depreciación efectuada en el año.

Valor en libros de los Activos Fijos. Determina el valor contable (en libros) que tienen los activos fijos, descontada la depreciación acumulada.
