### 3.1 Encuesta municipal 1990

—en municipios con población hasta 50.000 habitantes—

#### Notas metodológicas

La Encuesta Municipal 1990 investigó los siguientes aspectos: principales actividades económicas ingresos y gastos de la vigencia 1989, asentamientos subnormales, zonas indígenas y de colonización, calidad de la señal de TV en la cabecera y resto, medios de transporte directo con la capital del Departamento, el centro de acopio más importante, la cobertura y el equipamiento en la cabecera municipal; transporte, comunicaciones, servicios públicos y equipamiento en los centros poblados, diferentes a la cabecera y de las veredas.

Es conveniente advertir también que esta encuesta complementa y hace el seguimiento, en algunos temas, a las anteriores aplicadas en 1985 y 1988, denominadas Expedición Demográfica y encuesta para el PNR, respectivamente.

#### Metodología

1. Criterios de selección y cobertura. El municipio es la unidad de observación. Su cobertura abarca los noventa y tres (93) municipios con menos de 50.001 habitantes, con base en la población total municipal según el Censo de 1985.
2. Encuesta directa. La encuesta fue aplicada "in situ" por los Jefes de Zona de cada una de las Regionales del DANE, mediante las visitas periódicas que realizan para recolectar la información de las estadísticas continuas.
3. Fuentes de información. Para el diligenciamiento del formulario se tuvieron en cuenta varias fuentes, según los aspectos considerados en el mismo: el alcalde y demás autoridades locales; los gremios, asociaciones y comités, y los empleados de las entidades oficiales y no oficiales. Es así como las cifras fiscales fueron suministradas por el tesorero municipal o la oficina de planeación; la estadística educativa fue dada por el director de núcleo y/o inspector escolar local y en su defecto por los directores de establecimientos educativos; lo correspondiente a la infraestructura de salud se recogió en los hospitales, clínicas, centros y puestos de salud. Las estadísticas corresponden a la cabecera municipal.

#### Marco conceptual

##### 1. Estadísticas e indicadores fiscales (cuadro 1)

La base de los índices calculados es la ejecución presupuestal de la vigencia de 1989, es decir, los ingresos y gastos reales, con corte a 31 de diciembre.

En el *total de ingresos* del municipio van sumados los ingresos corrientes y los recursos de capital. Los corrientes están conformados por los recursos autorizados por ley que en forma permanente arbitra el municipio. Los ingresos corrientes se subdividen en tributarios y no tributarios.

*Los ingresos tributarios* gravan la capacidad económica y recaen directa o indirectamente, sobre personas naturales o jurídicas, con base en leyes, ordenanzas y acuerdos. Los principales ingresos tributarios son el de industria y comercio, el predial y complementarios.

*Los ingresos no tributarios* son los que provienen de fuentes distintas a los gravámenes a la propiedad, a la renta o al consumo, como por ejemplo las tasas, derechos, multas, aportes contractuales y participaciones. Las transferencias del IVA son el ingreso principal dentro de los no tributarios. Para algunos municipios, lo son las regalías.

*Los recursos de capital* son los provenientes de empréstitos internos y externos, los recursos del balance es decir el superávit fiscal de la vigencia anterior, el producto de las ocasionales ventas de activos fijos, como también los activos financieros y otras propiedades del municipio.

*El total de gastos* municipales está conformado por las erogaciones por concepto de funcionamiento, servicio de la deuda interna o externa y los gastos de inversión. Se entiende como gastos de funcionamiento, los servicios personales y los gastos generales cuyo fin es garantizar el funcionamiento normal de la administración pública (nómina, viáticos, compra de elementos de trabajo, etc.).

*El servicio de la deuda* es el pago de las obligaciones (amortizaciones, intereses, comisiones) por concepto de empréstitos internos o externos (moneda nacional o extranjera).

*Los gastos de inversión* son las erogaciones realizadas por el municipio para ejecutar actividades destinadas a procurar servicios a la comunidad.

Cómo interpretar los indicadores fiscales:

1. *Ingreso fiscal per cápita*. Se obtiene este indicador dividiendo el total de ingresos municipales por la población total del municipio, para saber cuál sería la distribución para cada ciudadano.

$$\text{Ingreso fiscal per cápita} = \frac{\text{Total de ingresos}}{\text{Población total municipal}}$$

2. *Necesidad de financiamiento.* En teoría, los gastos de funcionamiento más los de inversión no deben exceder a los ingresos corrientes, siendo *cero* el equilibrio entre los dos. En consecuencia, el signo positivo en la relación expresa necesidad de financiamiento y el negativo significa que el municipio no requiere endeudarse.

$$\text{Necesidad de financiamiento} = 1 - \frac{\text{Ingresos corrientes}}{\text{Gastos de funcionamiento} + \text{gastos de inversión}}$$

3. *Dependencia del IVA.* Si se tiene en cuenta que las transferencias de recursos provenientes del IVA (ley 12 de 1986) están en función de la población y la eficiencia en los recaudos del impuesto predial, este indicador muestra el grado de dependencia del municipio del ingreso con relación al citado. Entre más alto sea el porcentaje, mayor dependencia y viceversa.

$$\text{Dependencia del IVA} = \frac{\text{Ingresos IVA}}{\text{Total de ingresos}} \times 100$$

4. *Ahorro.* Una gestión requiere siempre un excedente que permita hacer inversiones para fomentar el desarrollo o al menos sostenerlo. En consecuencia, el ahorro sería el excedente de los ingresos corrientes menos los gastos de funcionamiento.

$$\text{Ahorro} = \text{Ingresos corrientes} - \text{gastos de funcionamiento}$$

5. *Tasa de ahorro.* Se obtiene este índice al dividir el ahorro entre los ingresos corrientes. Este coeficiente representa la mayor o menor importancia de este ahorro y lógicamente, la mayor o menor posibilidad de desarrollo municipal con los recursos ordinarios.

$$\text{Tasa de ahorro} = \frac{\text{Ahorro}}{\text{Ingresos corrientes}} \times 100$$

## 2. Estadísticas de salud en la cabecera municipal (cuadro 2)

Esta información se refiere a los servicios que el Estado (nación, departamento, municipio) y el Seguro Social ofrecen a la comunidad, según el criterio definido en el Manual de Diligenciamiento de la encuesta.

Son *centros de salud*, los organismos de atención que disponen de recurso médico por lo menos cinco días a la semana. Se diferencian de las instituciones hospitalarias puras en que no poseen presupuesto, junta directiva ni administración propios. *Los puestos de salud*, en cambio, disponen de servicio médico esporádico (una o dos veces por semana); estos organismos son atendidos en forma permanente por auxiliares o ayudantes de enfermería.

## 3. Estadísticas educativas (cuadro 3)

Según el Manual de Diligenciamiento, se entiende como *establecimiento educativo* la planta física destinada a la educación oficial y no oficial, que esté en funcionamiento en el momento de la encuesta. *La secundaria* comprende los cuatro años básicos de bachillerato o la media vocacional. Esta información se refiere al año 1990, para el calendario A y a 1989 para el B, que termina el año escolar en junio.

3.1 Encuesta municipal 1990  
Cuadro 1  
*Indicadores fiscales municipales*

| Municipios con población total igual a 50.000 habitantes o menos, según Censo de 1985 | Ingreso fiscal per-cápita pesos | Necesidad de financiamiento % | Dependencia del IVA % | Ahorro miles de pesos | Tasa de ahorro % |
|---------------------------------------------------------------------------------------|---------------------------------|-------------------------------|-----------------------|-----------------------|------------------|
| 2. Antioquia                                                                          |                                 |                               |                       |                       |                  |
| Abejorral                                                                             | 10.064                          | -0.10                         | 0.56                  | 123.884               | 0.50             |
