## Notas metodológicas

El sector de Comercio Exterior comprende las siguientes investigaciones: exportaciones, importaciones y exenciones aduaneras.

Las diferentes series estadísticas del sector muestran el intercambio de bienes del país con el resto de países del mundo; registran el intercambio legal de mercancías sometido al control aduanero y sus diferentes variables, a saber: valores y cantidades de los productos importados y exportados; países de origen y compra o destino de los bienes objeto del comercio; secciones político-administrativas del país que son origen o destino de las mercancías; aduanas por las cuales ingresan o salen las mercancías del país; composición del comercio exterior por capítulos y posiciones del arancel colombiano; comercio exterior por las principales clasificaciones internacionales CIU Rev. 2, CUODE, y generación de las series estadísticas básicas para el cálculo de los agregados de las cuentas nacionales y regionales.

La información se recoge y procesa mensualmente.

## Fuentes de información

Para las citadas investigaciones, las fuentes de información son las diferentes aduanas del país, que periódicamente envían a las direcciones regionales del DANE copia de los documentos de aduanas. La información básica de importaciones y exenciones aduaneras, se obtiene de las *Declaraciones de Importación* por los importadores o por sus agentes de aduanas. La información sobre exportaciones se obtiene del *Documento de Exportación*, adoptado por la Dirección General de Aduanas en septiembre de 1990.

Las cifras sobre café crudo o verde y café soluble, se toman de la información mensual suministrada por la Federación Nacional de Cafeteros. Los datos sobre las importaciones y las exportaciones de combustibles y derivados del petróleo, se vienen obteniendo desde enero de 1983 de la información mensual reportada por la Empresa Colombiana de Petróleos (ECOPETROL). A partir de 1987, se incluye además la información de las exportaciones de petróleo crudo de la Occidental y la Shell de Colombia.

## Investigación de exportaciones

Se entiende por exportación definitiva el régimen aduanero aplicable a las mercancías nacionales o de libre disposición que salen legalmente del territorio aduanero colombiano a una zona franca industrial o a otro país, para su uso o consumo definitivo.

**Cobertura.** Comprende: artículos de producción y manufactura nacional, equipajes de los pasajeros que salen y que contienen artículos no clasificados entre los de uso

personal; muestras con valor comercial declarado, encomiendas postales, mercancías en retorno (reexportaciones), donaciones de Colombia a gobiernos de países extranjeros; artículos de propaganda, transacciones especiales de comercio tales como aprovisionamiento de naves, equipos y piezas suministradas para la reparación de barcos, aviones y otros vehículos extranjeros, y las exportaciones de carácter temporal.

Se exceptúan las mercancías salidas en tránsito hacia otros países; las muestras sin valor comercial, los impresos remitidos por correo, y los efectos personales de los pasajeros que salen al exterior.

**Origen o procedencia de los artículos exportados.** Se refiere en la mayoría de los casos, a centros productores o manufactureros de los artículos exportados, según su localización geográfica (sección político-administrativa) dentro del país; sin embargo, en algunas ocasiones la referencia es directamente a las zonas donde se concentran determinadas mercancías para su exportación.

## Investigación de importaciones

Son las mercancías de diferente índole que entran al territorio nacional, sometidas a control aduanero, para consumo interno, o para ser transformadas y luego exportarlas.

**Cobertura.** Comprende: encomiendas postales, muestras con valor comercial declarado, mercancías en retorno (reimportaciones), equipajes de los pasajeros que entran, y que contienen artículos no clasificados entre los de uso personal; donaciones de gobiernos extranjeros a Colombia; transacciones especiales de comercio (pescado, artículos y material procedente del salvamento de embarcaciones naufragadas; reposición de partes o piezas averiadas, suministradas como indemnización de seguros o como garantía otorgada por el fabricante).

No se incluyen: mercancías en tránsito hacia otros países, muestras sin valor comercial e impresos llegados por correo.

**Destino de los artículos importados.** Las cifras que se incluyen en este volumen por secciones del país, se refieren a la cantidad de cada artículo importado con destino a las diferentes secciones político-administrativas en que se divide el país, la cual puede ser consumida en tales regiones, distribuida hacia otras, o bien sufrir una transformación y luego posteriormente ser exportada.

## Investigación exenciones aduaneras

Mediante esta investigación, se conoce el monto de los derechos ad valorem que el gobierno nacional exonera a las importaciones efectuadas por entidades de derecho público, el culto católico, las universidades y los establecimientos de educación, las industrias minera y petrolera, etc.. Para tener derecho a estas exenciones,

se requiere el concepto previo favorable de la Junta de Importaciones del Incomex. La solicitud de exención de los derechos de aduanas, se debe presentar por escrito al Director General de Aduanas, citando la ley, tratado público o contrato que lo autorice.

**Clasificaciones internacionales.** Son clasificaciones estadísticas que agrupan las diferentes mercancías según niveles de desagregación, características de su utilización o finalidad económica, zonas geográficas o grupos económicos, y de gran importancia desde el punto de vista de comparabilidad de las cifras de comercio exterior a nivel internacional. Entre estas clasificaciones se destacan las siguientes:

**CUODE.** Clasificación según uso o destino económico. Esta clasificación agrupa las diferentes mercancías según el fin económico al cual serán destinadas, así: bienes de consumo (duradero y no duradero), materias primas y bienes intermedios y bienes de capital.

**CIU Rev.2.** Clasificación Industrial Internacional Uniforme de todas las actividades económicas. Clasificación de artículos o productos según categorías de la actividad económica, reflejando la estructura de la producción, es decir, la forma como las actividades económicas se combinan en las unidades de producción y su distribución. Agrupa los productos en : grandes divisiones, divisiones de actividades, agrupaciones, y en grupos específicos.

**Balanza comercial.** Se define como la diferencia entre las exportaciones valor FOB y las importaciones valor CIF; ésta es positiva o favorable si las exportaciones son mayores que las importaciones, y es negativa o desfavorable,

cuando aquéllas son menores que las importaciones.

**Valor CIF:** (CIF: Cost, Insurance, Freight, es decir costo seguro y flete). Es el precio total de la mercancía, incluyendo en su valor los costos por seguros y fletes. Es decir, el precio comercial en el extranjero más el valor que paga el importador por los seguros y el transporte de la misma hasta el puerto colombiano.

**Valor FOB:** (FOB: Free on board, es decir, libre o puesto a bordo). Es el precio de venta de los bienes embarcados a otros países, puestos en cubierta del barco transportador, anclado en puerto colombiano, sin incluir valor de seguro y fletes.

**Zona económica.** Se define como el conjunto de países que integran una zona y entre los cuales existen convenios de tipo comercial o económico.

## 11.4 Financiación de vivienda

### Introducción

Esta investigación fue iniciada por el DANE en el año de 1985, además de servir de guía para los programas de desarrollo, presenta un estudio en forma coherente y continua sobre la demanda de vivienda, por medio de los créditos para compra de vivienda y lotes con servicios, otorgados por las entidades financiadoras; asimismo presenta información sobre la oferta de vivienda, en cuanto a los proyectos de construcción que se llevan a cabo con préstamos suministrados a las mismas entidades.

La fuente de información está constituida por todas las entidades que financian vivienda: Instituto de Crédito Territorial (ICT, actualmente INURBE), Fondo Nacional de Ahorro (FNA), cajas de vivienda, Banco Central Hipotecario (BCH) y corporaciones de ahorro y vivienda (CAVS).

La recolección se efectúa por medio de formularios que son diligenciados directamente por cada una de las entidades financiadoras. Se publica por secciones del país, capitales departamentales y rangos de precios (en UPAC) de las viviendas.

La metodología y los primeros datos relativos a crédito para compra de vivienda nueva y lotes con servicios, empezaron a publicarse en forma continua desde el Boletín de Estadística No. 6 de 1986. Contiene información que se recolectó con referencia al año de 1983 y los dos semestres de 1984; de 1985 hasta la fecha se dispone de información con periodicidad trimestral.

### Conceptos principales

**Créditos entregados:** se refiere a los créditos individuales perfeccionados en el respectivo período, para compra de vivienda nueva y lotes con servicios. Dentro de estos préstamos se incluyen igualmente, aquéllos que han sido entregados para la edificación de vivienda de los beneficiarios; y los destinados a autoconstrucción individual. No son considerados los préstamos para compra de vivienda usada, ampliación, reparación o división de unidades de vivienda. En el caso de las corporaciones de ahorro y vivienda, se contabilizan únicamente los créditos que han sido objeto de subrogación (transferencia de créditos de constructores a compradores).

**Valor de los créditos:** relaciona el monto total de los créditos entregados a las personas que compran vivienda nueva y lotes con servicios. Considera la totalidad de los préstamos, en millones de pesos corrientes, incluyendo los desembolsos efectivos y las subrogaciones perfeccionadas.

**Vivienda nueva y lotes con servicios entregados:** bajo este concepto se contabilizan las viviendas nuevas y lotes con servicios que fueron escriturados o entregados físicamente al beneficiario, y las viviendas construidas con préstamos individuales para uso del beneficiario que se terminaron en el período (incluyendo las que fueron edificadas con préstamos individuales de autoconstrucción).

En relación con las corporaciones de ahorro y vivienda, se consideran únicamente las viviendas que fueron objeto de subrogaciones "constructor individual".

Notas:

<sup>1</sup> El ICT no rindió información para el IV trimestre de 1991 porque actualmente se encuentra en el proceso de aplicación de las nuevas políticas de vivienda de interés social.

<sup>2</sup> Las cifras del ICT, agregadas en este cuadro a las correspondientes de las demás fuentes, corresponden a valores promedios aproximados.

<sup>3</sup> Estas cifras no incluyen información sobre subsidios familiares para vivienda de interés social reglamentados por la Ley 3a. de enero de 1991.
