#### 8.1 Producción-agrícola

Primera encuesta nacional agropecuaria, 1988

Notas metodológicas

Cuadro 1. *Superficie total de las unidades de producción agropecuaria (UPA) con tierra:* por uso actual del suelo, según tamaño, total departamentos, 1988.

Cuadro 2. *Superficie total bajo las unidades de producción agropecuaria (UPA) con tierra:* por uso actual del suelo, según departamentos, 1988.

Cuadro 3. *Superficie total bajo las unidades de producción agropecuaria (UPA) con tierras:* por forma de tenencia, según departamentos, 1988.

Cuadro 4. *Productos:* superficie, producción y rendimiento, según secciones, 1988.

Cuadro 5. *Número de unidades de producción agropecuaria (UPA) y trabajadores:* por sexo, según departamentos, 1988.

Cuadro 6. *Número de unidades de producción agropecuaria (UPA) información y personas del hogar censal:* por sexo, según departamentos, 1988.

#### 8.2 Producción-ganadera

Cuadro 1. *Sacrificio de ganado:* vacuno y porcino por sexo, según capitales de departamento 1991 (acumulado enero-diciembre).

#### 8.3 Producción-minera

Cuadro 1. *Carbón:* reservas por categorías, según regiones, evaluación 189.

Cuadro 2. *Carbón:* producción según regiones, 1988-1990.

Cuadro 3. *Carbón:* consumo por sectores económicos, según secciones, 1988-1990.

Cuadro 4. *Oro:* producción y valor según municipios, 1990-1991.

Cuadro 5. *Plata:* producción y valor según municipios 1990-1991.

Cuadro 6. *Platino:* producción y valor según municipios 1990-1991.

Minerales explotados, minas y personal ocupado por municipios 1988 (cuadro 7).

Notas metodológicas.

Cuadro 7. Número de unidades de explotación por tipo de minería, según municipios y minerales explotados, 1988.

#### 8.4 Producción-manufacturera

Cuadro 1. *Resumen de 8 variables principales:* personal ocupado, sueldos y salarios, prestaciones sociales, producción bruta; consumo intermedio, valor agregado, valor libros activos fijos y consumo de energía eléctrica por municipios 1980-1990.

#### 8.5 Producción-construcción

Cuadro 1. *Licencias:* número y área aprobada para 90 municipios, 1986-1991.

#### 8.6 Producción-energía eléctrica

Cuadro 1. *Generación, demanda y suscriptores;* según sectores de consumo, por empresas filiales del grupo ICEL, 1990.

Cuadro 2. *Generación, demanda y suscriptores,* según sectores de consumo, por empresas del grupo CORELCA y otros independientes, 1990.

#### 8.7 Producción-censo económico

Cuadro 1. *Establecimientos:* por actividad económica, según municipios Censo nacional económico multisectorial 1990.

---

## 8.1 Producción-agrícola

### Notas metodológicas

#### Primera encuesta nacional agropecuaria, 1988

**Unidad de producción agropecuaria:** es un terreno, parte de un terreno o grupo de terrenos en el (los) cual (es) se desarrolla actividad agropecuaria bajo la dirección de un mismo productor, independiente de la condición de tenencia, forma jurídica, tamaño o ubicación. Para el caso del SEAM, solo se tendrán en cuenta como parte de la UPA, los terrenos ubicados dentro del departamento donde se encuentra el segmento de muestreo (SM).

**Segmento de muestreo ((SM):** es un pedazo pequeño de tierra delimitado por accidentes físicos (naturales y/o culturales) fácilmente identificables sobre el terreno y delineado sobre una fotografía aérea o un mapa. El el muestreo agrícola de áreas, la unidad de muestreo es el segmento de muestreo.

**Productor agropecuario:** es la persona natural o jurídica que tiene la iniciativa económica y técnica sobre un terreno, parte de un terreno o grupo de terrenos en el (los) cual (es) se desarrolla actividad agropecuaria (Unidad de producción agropecuaria) y toma las principales decisiones acerca de la utilización de los recursos disponibles. Puede ejercer sus funciones de manejo en forma directa o delegar las actividades relativas a la acción cotidiana de los trabajos a un gerente o a un administrador contratado.

El trabajo del productor agropecuario puede ser material, cuando en forma personal ejecuta las faenas de la unidad de producción, o intelectual, como en el caso de aquel que tiene su domicilio en la ciudad y visita periódicamente los terrenos para impartir órdenes sobre la organización y orientación de la producción.

**Aprovechamiento o uso actual de la tierra:** el aprovechamiento o uso actual de la tierra es el modo como se encuentran utilizadas las tierras de la unidad de producción agropecuaria (UPA) en el día de la entrevista. La información sobre este aprovechamiento debe incluir la superficie total de las tierras, que se utilicen o no para la producción agropecuaria. Se considera la siguiente clasificación:

- Cultivos transitorios (solos, asociados y/o intercalados) y forrajes
- Superficie en barbecho
- Superficie en descanso
- Cultivos permanentes (solos, asociados y/o intercalados)
- Superficie en pastos
- Superficie en malezas y rastrojos
- Superficie en páramos

h. Superficie en bosques naturales y de plantación

i. Tierras improductivas y otros fines

j. Superficie potencialmente agropecuaria

Los terrenos que componen la unidad de producción agropecuaria (UPA), son clasificados en una y solo una de las formas de aprovechamiento mencionadas.

**Tenencia de la tierra:** la condición de tenencia de la tierra se refiere a los arreglos o derechos en virtud de los cuales el productor agropecuario detenta o usufructúa la tierra, ya sea bajo una o varias formas de tenencia. Se considera la siguiente clasificación:

- Propiedad o posesión análoga a la propiedad
- Arrendamiento (efectivo, especie, combinado, aparcería, prestación de servicios y otros arreglos)
- Colonato
- Otras formas de tenencia

**Producción agrícola:** es la cantidad de producto primario obtenido como resultado económico de la actividad realizada en la UPA, durante el período tomado como referencia. Para ciertos productos tales como café, cacao, etc., esta incluye el tratamiento preliminar requerido para su comercialización o almacenamiento.

**Estado del producto:** es el estado en el cual se estima la cantidad obtenida del producto. Por ejemplo, la producción de caña de azúcar se puede informar así: en tallo fresco cortado o en azúcar. A continuación se enuncia el estado en que se presenta la producción de los principales cultivos incluidos en este documento.

| Cultivos        | Estado del producto  |
|-----------------|----------------------|
| Aguacate        | Fruto fresco         |
| Banano          | Fruto fresco         |
| Cacao           | Almendra seca        |
| Café            | Grano seco           |
| Caña de azúcar  | Tallo fresco cortado |
| Caña panelera   | Panelas              |
| Coco            | Fruto fresco         |
| Chirimoya       | Fruto fresco         |
| Fresa           | Fruto fresco         |
| Guayaba         | Fruto fresco         |
| Lulo            | Fruto fresco         |
| Limón           | Fruto fresco         |
| Mandarina       | Fruto fresco         |
| Naranja         | Fruto fresco         |
| Palma africana  | Aceite               |
| Papaya          | Fruto fresco         |
| Piña            | Fruto fresco         |
| Plátano         | Fruto fresco         |
| Tomate de árbol | Fruto fresco         |

◇

**Trabajadores familiares sin remuneración (trabajadores no remunerados miembros del hogar censal del productor):** son todas aquellas personas de 10 años o más, miembros del "Hogar Censal" del productor agropecuario (incluyendo a éste), cuyos servicios se utilizan en la unidad de producción agropecuaria (UPA), para trabajos agropecuarios, sin recibir como contraparte remuneración en efectivo.

**Trabajadores con remuneración:** son todas aquellas personas de 10 años y más cuyos servicios se utilizan en la unidad de producción agropecuaria (UPA) para trabajos agropecuarios, recibiendo como contraparte un salario en efectivo (salario, a destajo, en comisión, propina) o en especie, según rango de número de horas trabajadas.

**Hogar censal del productor:** es el conjunto de personas generalmente ligadas por lazos de parentesco, que normalmente viven juntas bajo el mismo techo (vivienda), comen de la misma olla y se han reunido para hacer la vida en común por razón de su trabajo o por algún otro tipo de relación. En el caso del productor agropecuario, se refiere a sus parientes y a las demás personas que

conviven con él, alimentándose de la misma olla y compartiendo el mismo techo. Las demás personas que comparten los cuartos ocupados por la familia del productor agropecuario o las que viven solas, como inquilinos o huéspedes, pero que no preparan las comidas con la familia del mismo, se consideran como otro (s) hogar (es) censal (es). Dentro del "hogar censal" se incluye a los miembros de familia del Productor que temporalmente se hallen fuera del hogar, pero se excluyen del mismo a los visitantes temporales.

El *hogar censal* del productor puede tener una de las siguientes formas:

**Hogar censal unipersonal:** compuesto por una sola persona que provee sus necesidades alimenticias y de otra índole vital, sin unirse a ninguna otra persona para formar parte de un hogar multipersonal.

**Hogar causal multipersonal:** es el grupo de 2 o más personas que se asocian para proveer sus necesidades alimenticias u otras esenciales para vivir. Los miembros de un grupo pueden mancomunar parte de sus ingresos para conformar un presupuesto único.

## Minerales explotados, minas y personal ocupado por municipio, 1988 cuadro 7

### Notas metodológicas

El Censo Nacional Minero de 1988, fue el primer evento estadístico de esta naturaleza realizado en el país por el Departamento Administrativo Nacional de Estadística –DANE, mediante convenio de cooperación técnica con el Ministerio de Minas y Energía y con la colaboración de entidades del sector minero como Carbocol, Ingeominas y Ecominas (hoy Mineralco S.A.).

Tuvo por objeto obtener información estadística sobre la minería en todo el territorio nacional. En tal sentido, suministró un marco censal basado en la identificación, ubicación y localización cartográfica de las unidades de explotación existentes en el territorio nacional, el cual se utilizará para la implementación de las muestras de ampliación y diversos estudios que requieran información con amplio grado de detalle.

El operativo censal, realizado entre el 21 de noviembre y el 10 de diciembre de 1988, investigó variables económicas como: producción, empleo, insumos, maquinaria y equipo; y variables técnicas relacionadas con las características de las explotaciones minerales tales como: métodos y sistemas de explotación, forma de presentación y de extracción de los minerales, medios de transporte dentro de la mina, materiales principales usados en la fortificación de las minas subterráneas, sistemas de ventilación, desagüe, alumbrado, equipos para medición de gases y de salvamento minero, procesos de beneficio de los minerales y daño ecológico producido por el agua y por los materiales de desecho.

La unidad estadística de observación investigada por el Censo Minero fue la *Unidad de explotación minera o mina*, definida como “el área dedicada a la explotación de un yacimiento mineral, la cual constituye una unidad técnica y económica conformada alrededor de un explotador que puede ser una persona natural o jurídica”.

De acuerdo con los resultados definitivos obtenidos, se censaron en todo el país 8.235 unidades de explotación o minas; de ellas se explotan o extraen 39 minerales diferentes, entre los que sobresalen, por su importancia económica, el oro y el carbón (ver *resultados generales del Censo Minero de 1988*, publicación del DANE disponible en los Bancos de Datos). No obstante en la columna relativa a *unidades de explotación (minas)*, se registran sólo aquellas unidades que informaron el mineral explotado.

### Personal ocupado por tipo de minería

La citada definición de *mina*, involucra la minería que

posee algún grado de tecnificación y organización. De esta manera, por razones metodológicas se definieron dos tipos de minería:

- Cuando la mina se caracteriza por ser una explotación pequeña o mediana de propiedad individual, sin organización empresarial ni registro y contables, se denominó *minería informal*.
- Si la mina se caracteriza por ser una unidad de explotación de cualquier tamaño, de propiedad de una empresa legalmente constituida, que dispone de registros contables y de producción, se clasificó en la categoría de *minería formal*.

El personal ocupado sobre el cual se informan resultados para las minerías formal e informal, incluye el personal vinculado a la mina con carácter permanente y/o temporal.

Sin embargo, en Colombia existe un sector de la minería en el que se desarrollan actividades de pequeña escala por personas que se denominaron en el Censo micromineros, definidos como: “personas naturales que dedican su fuerza de trabajo a la extracción de minerales, utilizando métodos rudimentarios”. Las cantidades extraídas son pequeñas y generan usualmente ingresos de subsistencia para el microminero y sus asociados. La actividad de los micromineros corresponde a la *minería de subsistencia* y se circunscribe principalmente a la extracción de oro de aluvión, plata y platino (*barequeros*) y a las esmeraldas que se encuentran en los residuos de las grandes explotaciones (*guaqueros*); y también a la explotación de sal de mar, arena de río, grava, piedra, gravilla, arcilla, minerales de aluminio (bauxita), bentonita, caolín, feldespato, talco, minerales de hierro, yeso, arena de mar, sal terrestre y otros. La extracción de oro, plata, platino y esmeraldas de subsistencia no se investigó en el Censo.

Dado que la *actividad de subsistencia*, se realiza principalmente en grandes áreas comunes, denominadas *frentes de trabajo*, como canteras, areneras, lecho de los ríos, del mar, etc., los cuales por sus características no constituyen unidades técnicas que se puedan asimilar al concepto de mina, se optó por publicar (cuadro 7), para esta minería, tan sólo lo relativo a número de personas ocupadas en la extracción de minerales durante el período de referencia, vale señalar, que las unidades de explotación son excluyentes a la actividad de subsistencia.

### Período de referencia

El período de referencia de los datos sobre personal ocupado, fue la *semana anterior a la fecha del Censo*, para los casos de las minerías informal y de subsistencia; no así en la minería formal, cuyo período se refiere a la

*semana que incluye el 15 de noviembre de 1987.* Para las unidades de explotación en actividad, el período de referencia fue el *momento del Censo*.

### **Cobertura**

El Censo abarcó las explotaciones mineras de todo tamaño y de todos los minerales, excepción hecha del petróleo y sus derivados, que son recursos energéticos no minerales, sobre los cuales se contaba con suficiente información a través de Ecopetrol. Igualmente, se excluyeron del Censo la minería de subsistencia de los barequeros y gUAQUEROS por razones de costo-beneficio.

En el cuadro de resultados, tan sólo se incluye infor-

mación para aquellos municipios que reportaron al menos la existencia de una mina en actividad, durante los períodos de referencia.

De los 764 municipios que según el precenso (actividad previa al Censo) reportaron tener explotaciones mineras, sólo fueron censados 641; los demás se excluyeron por razones de costo-beneficio, orden público, invierno en algunos, etc.. De las 11.502 minas reportadas por el precenso, 2.452 no se encontraron en el Censo y se clasificaron como minas inexistentes. Teniendo en cuenta los municipios excluidos y áreas no visitadas durante el Censo, la cobertura se estima en el 93% de las unidades de explotación.
